Subject: Contract RD-77, Task Order "H"

1. Enclosed find photostatic copies of six representative pages from the new Identi-Kit Handbook. Quite a bit of fine line detail disappeared in making these copies. This is due to the nature of the photostat process which is a quick and relatively inexpensive copying method. The original paste-up art is extremely sharp and clear and will come out beautifully with a good job of printing. These pages are actual size of the new handbook, which fits under the metal pan in the new kit. The Zip-A-Tone screen shading applied to the "Hair" Page, 30, is merely to give you an approximation of the background which will be on each page. In actuality, the screen tone will have no breaks in it as you see here where sections join, but will be smooth and a much finer dot pattern.

2. The art work for the book is now completed and will soon be on the presses. Everything looks very good and should make an excellent handbook.

3. Sample pages of the text will be furnished early next week.

Very truly yours,
